

UNITED STATES GOVERNMENT

DEPARTMENT OF THE NAVY

# Memorandum **SECRET**

DATE : 12 April 1968

FROM : REWSON Systems Project Manager  
TO : Office of Special Activities (Attn: [REDACTED])  
SUBJECT : APQ 93

25X1A9a

1. It is understood that the APQ 93 currently being removed from the F-101 Aircraft at Westinghouse is to be placed in storage. It would be deeply appreciated if this radar could be placed in bonded storage at the Columbus Division of North American Rockwell 4300 E 5th Street, Columbus, Ohio (care of Mr. John P. FOSNESS).
2. This request is based upon current navy plans not yet definitized to conduct Research and Development tests leading toward the replacement of the current SLR in the RA5C with the APQ 93. If the other two APQ-93s are available similar storage would be helpful.
3. At such time as the Navy definitizes this program your permission will be requested to utilize the equipment in navy aircraft.

  
Wiley B. HOWELL  
Captain, U. S. Navy
